

# Learning for Europe's future - A wave or a tornado?

Miriam Teuma - Agenzija Zghazagh - Malta

# Where are we heading to?

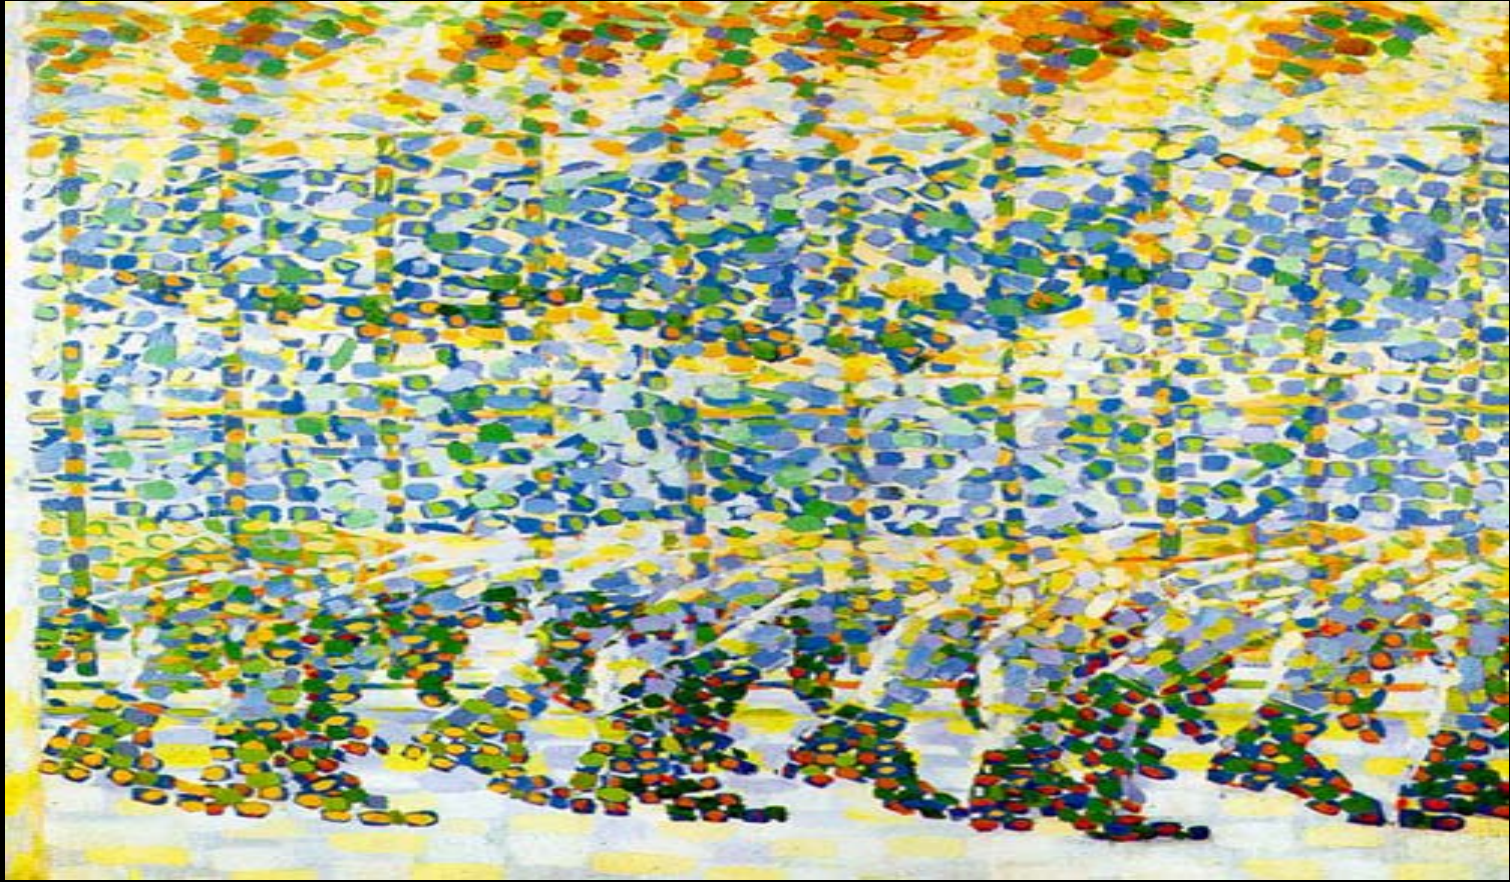

---

## Towards a new Culture?

# Migration and Demographic Challenges in Europe

---

# The challenge to the old political and social order

---

# The Democratisation Process

---

# Globalisation and the World Economy

---

# From Multiculturalism to Interculturalism to.....

---

# The Virtual World

---

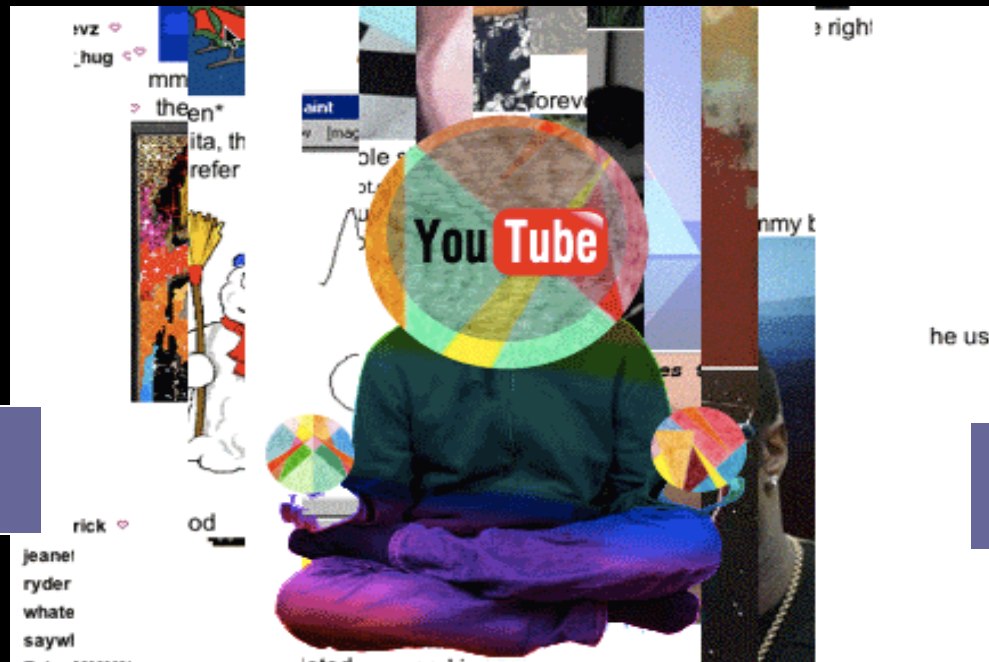

# A collapse of Time and Space

---

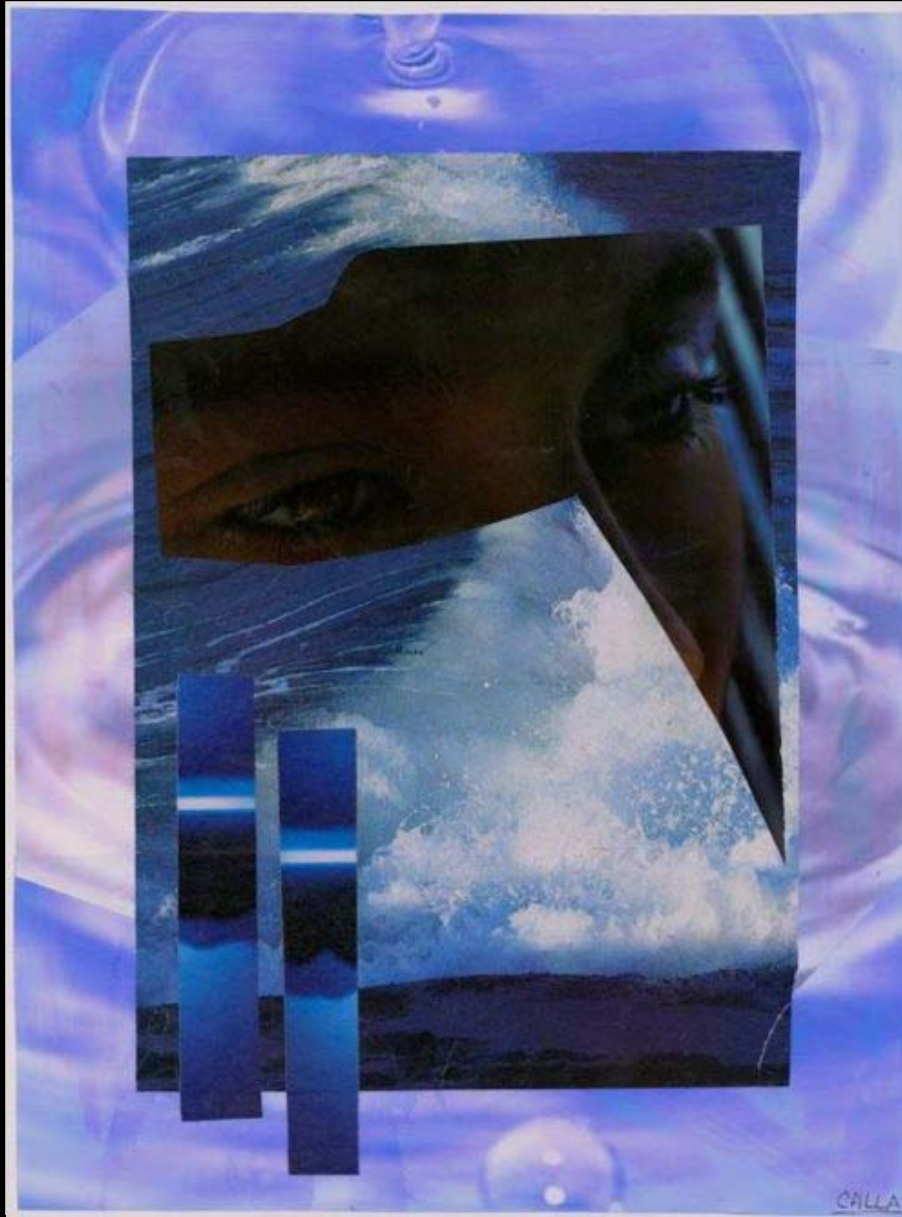

This dynamic of change is creating a new social construct which is both complementing and changing existing social relationships. Young people through the virtual world network are creating a new kind of community in a global village.

Just presented some of the  
challenges

---

We have become the agents of change and also the objects of change. Change presents new challenges and opportunities.

How do we meet these new challenges and opportunities?

What do we need to learn to successfully meet the challenges?

# Does a new way of Learning need

---

- to adopt a new form and process that allows stability to emerge from variability and uncertainty?

# We need to find ways

---

- to respond better to the challenges
- adapt more quickly to avail of the opportunities
- and find new ways of learning and new ways of doing things

# Learning

---

- has it become more of a flat playing field?

# How do we support and facilitate an attitude to learning for the future?

---

- Ways to learn what we should learn
- Ways to evaluate our learning
- Ways to self reflect and introspect our development
