1. Youth participation in Malta

Give an overview on participation of young people (13 – 30) in your country on the national and regional level (in federal states) answering the following questions:

Are there official national/regional recommendations (policies) establishing the right of young people to participate in society? The National Youth Policy 2010-2013

If so: how is the concept of youth participation defined?

The National Youth Policy 2010-2013 states that “Participation and engagement foster the energy, enthusiasm and creativity of young people. This policy affirms genuine participation of young people in all spheres of society. It uses participation as a main tool for three main purposes: political, legal and social. The rationale for youth participation acknowledges the:

- engagement of young people within political and social processes;
- development of an environment where young people have the opportunity and motivation to develop the skills to become strong active citizens who bring about change.

- What are the measures envisaged to promote different forms of participation on local, regional and national level?

On a national level participation of young people is promoted through National Youth Council and the Youth Parliament while on a local level through the Youth Local Councils. A means to ensure this participation is the continuous structured dialogue with young people in drafting of different youth policies.

4. Learning to participate

4.1 The formal education system

*Please describe existing mechanisms within the system of formal education aiming at developing and deepening learning to participate in your country.*

One of the existing mechanisms in formal education is Eco Skola: The Aims are to empower students to adopt an active role in environmental decision making and action in their school and in their community. Schools that have successfully achieved this goal are awarded a Green Flag - a prestigious eco-label testifying the school's commitment to fostering sustainable lifestyles. This will be achieved after:

- Set-up a Committee (consisting of students and other members of the school community) that manages the Eco Skola process.
- Students carry out an Environmental Review of the school to assess the environmental impact.
- Identify the priorities and set up an Action Plan to meet targets.
- Incorporate environmental education across the curriculum.
- Inform and involve all stakeholders and the wider community.
- Draw up an Eco code with our schools' environmental principles.

Another mechanism is PSD. Personal and Social Development (PSD) in the Maltese islands developed in a unique way, in that it was not imposed as a policy, but gained ground as people started understanding its positive effects. Its development and implementation is in itself a journey in the way educators started viewing a more democratic system of education and teaching. The mission statement of the PSD syllabus states: 'PSD aims at empowering students to develop skills, knowledge and attitudes which will enable them to live and participate fruitfully and effectively in their environment (Abela et al, 2002, p. 2).

PSD aims at empowering students to fulfil their potential effectively and positively. Although the pedagogical skills used in PSD in Malta, promote the concept that students/participants arrive at their own value system, the inherent philosophy and implementation of the subject promotes universally regarded positive values such as respect for self and others, diversity, critical thinking, problem solving and democracy.

Are there teacher trainings programmes at the national and/or regional level on this topic?

Yes, in-service courses are provided to teachers.

4.2 Non formal education

Please describe five to ten existing examples of actions/programmes/activities at national or regional level, outside the formal education system, aiming at developing and deepening learning to participate in your country.

On a national level Agenzija Zghazagh has set up an Empowerment Programme. This programme is mainly made up of the following:

Local Youth Council Project: The youth local council project is an initiative in collaboration with Local Councils and KNZ, which aims to engage a group of young people, between 14-18, to form a youth local council parallel to the actual Local Council. The young people in the local council take up the roles of mayor, vice mayor, secretary etc and are given training on how to exercise their role and run a committee. Each group of youth councillors are followed and mentored by a youth worker. Youth local councils are encouraged to assess young people’s needs in the locality and write a project proposal to address these needs. The proposals submitted to Agenzija Zghazagh are evaluated and Agenzija Zghazagh finances the three best proposals for implementation.

Structured Dialogue: The structured dialogue is an initiative in which Agenzija Zghazagh will develop a space for debate to reach an understanding and build consensus on the main challenges related to young people. It aims to find ways to improve youth policy and advance and strengthen partnerships between young people and policy makers by exploring issues and generating ideas.

Student School Council Project: Agenzija Zghazagh envisages to support the student school councils by providing training to the students to understand better their roles and responsibilities in a student council and explore how they can develop small school or college projects catering for students’ needs.

VolTours: The aims of the VolTour initiative are to provide young prospective volunteers that are interested but maybe are not sure in which field they would like to invest their time and energy, or have other questions that might need answers before they take any decision to volunteer, with the opportunity to meet with young volunteers that are already involved to share and discuss their experience. Furthermore, it provides them with the opportunity to better understand how youth organisations function and operate and provide them with a taste of what volunteering is all about.
Konkors Letteratura ghaz-Zghazagh: Literature for youth is a writing contest in collaboration with Kunsill Malta ghall-Ktieb which encourages both established writers and young writers to write short stories, novels etc. for young people. The best proposals chosen i.e. that submitted by the young person and that submitted by more established author are published through an established publisher and made available to the public. The aim of this project is twofold to encourage young writers to submit work and engage them in the process of writing and publication and also to publish interesting and suitable reading material for young people to encourage them read more.

The empowerment programme also runs on a local level through the Training Schedules implemented with Local Councils and/or NGOS and aims to provide a number of training initiatives for young people from 16 years of age and upwards. The complete programme is composed of 6 training schedules of 6 sessions per schedule.

5.4. Young people’s involvement in youth information

*How do young people participate in the national/regional system of youth information?*

The whole concept of the youth information portal was conceived through the direct participation of young people. A group of young people together with a researcher engaged in youth-led research to investigate young people’s information seeking behaviour. After designing and distributing a questionnaire to other young people they concluded that the preferred source of information by young people was by far the internet.

Participation of young people in youth information is an ongoing process. The youth information portal has a section called “Have your say” where young people can freely express their opinion on several matters.
6. Informal ways of young people’s participation

Please describe informal ways used by young people to make their voices heard in society in your country.

During the recent referendum campaign, regarding the introduction of divorce, social networks such as Facebook were used by different groups of young people, both pro and against divorce to make their voice heard on the issue.

Please describe alternative ways of youth participation connected to the use of online technologies answering the following questions:

Top down approach (e.g. online consultations): in which occasion?

There was a top down consultation with young people on the pension reform and also the current issue of the new curriculum framework.

Bottom up approach (e.g. organised actions through social networks and the internet): in which occasion?

The strength of social networks for the bottom up approach was quite explicit during the divorce referendum campaign.
