Departures

Course objectives

The course objectives – across both residential seminars – are to:

- introduce European youth policy frameworks and relate those frameworks to the variety of realities from local and regional to national and European levels;
- analyse youth policy concepts and interrogate its main principles (e.g. evidence-informed, participatory and cross-sectoral) and approaches (e.g. youth rights, youth needs and youth well-being);
- facilitate the shaping of manageable strategies for intervention in the contexts of the actors present.
