1. **Introduction and aim of the Pathways 2.0 paper**

In February 2004, the Youth Directorates of the Council of Europe and the European Commission published a joint working paper ‘Pathways towards Validation and Recognition of Education, Training and Learning in the Youth Field’\(^1\). It highlighted a strong need for social and formal recognition of non-formal and informal education/learning\(^2\) in youth work activities. The paper argued that non-formal education/learning in the youth field is more than a sub-category of education and training since it is contributing to the preparation of young people for the knowledge-based and the civil society. It stressed the need to raise awareness of the value of youth work among key persons, institutions and young people themselves and asked for developing effective and flexible ways for validation and recognition. A number of concrete activities and commitments were proposed in the paper, addressed at the European institutions, the Member States, the NGO sector, the education and training field and specifically the youth sector.

The Pathways paper encouraged a European-wide debate on the meaning and status of non-formal learning in the youth field. Since its publication developments in the field of non-formal learning/education (and its recognition) have been dynamic but also very diverse, at European as well as at national level. Major political achievements have been reached and a variety of tools and instruments were developed. Also co-operation and dialogue within the youth field and of the youth sector with other areas, in particular education and training, has considerably increased.

Now, six years after publishing the first Pathways paper and more than 10 years after starting the development and implementation of respective strategies to better recognise non-formal education/learning, the partnership team of the Council of Europe and the European Commission in the field of youth, in cooperation with the European Youth Forum and the SALTO Training and Cooperation Resource Centre, realised the need to update and re-focus the strategy as outlined in the first paper, in order to give the strategy a new impetus for a better recognition of non-formal learning in youth activities and of youth work in general. The initiative to re-dynamise the efforts on recognition goes also back to the European workshop “Continue the pathways towards recognition....” held in Prague in June 2008 under the Czech EU Presidency, where the participants invited and encouraged the EU-CoE youth partnership to take the lead in updating the strategy. Both institutions sustaining the EU-CoE youth partnership, European Commission and Council of Europe were closely associated to the redrafting of the paper.

Reflecting the participatory nature of youth policy, the current paper was developed together with youth organisations, the main providers of non-formal education in the youth field, mainly represented by the European Youth Forum. A further number of stakeholders were involved in the reflection when starting to re-draft this paper such as National Agencies and SALTO Resource Centers of the Youth in Action Programme, the communities of trainers and researchers as well as policy-makers from various levels and backgrounds.

---

\(^1\) Pathways towards Validation and Recognition of Education, Training & Learning in the Youth Field. Working paper by the Youth Unit of the Directorate 'Youth, Civil Society, Communication' in the Directorate General 'Education and Culture' of the European Commission and the Youth Department of the Directorate 'Youth and Sport' in the Directorate General 'Education, Culture and Heritage, Youth and Sport' of the Council of Europe, Strasbourg and Brussels, February 2004

\(^2\) This paper - as the first Pathways paper did - uses both terms, non-formal learning and education (NFEL) when reflecting on the pedagogical dimension of youth work activities, their methods, tools and approaches and the environment in which they take place; thus it tries to respect diverse traditions, definitions and understandings existing in European countries.
The aim of this Pathways paper 2.0 is to provide a new vision and an outline on how to sustain and to foster the progress made until today and, even more, to go beyond the achievements made so far. This aim is based in the political agendas of the two European institutions, Council of Europe and European Union and the expectations of many providers of non-formal learning/education and of youth work. The political agendas are documented on the one hand in "The future of the Council of Europe’s youth policy: Agenda 2020" and on the other hand in "A renewed framework for European cooperation in the youth field (2010-2018)".

The recognition of non-formal education/learning - and of youth work in general - is an important goal for the two institutions and its partners in the youth field. It is not an aim in itself, it is part of a coherent vision on how to improve the inclusion and well-being of young people in our society and empower them to be active citizens. In this respect, youth work plays a crucial role as outlined in the political documents and expressed at various occasions with the aim of granting youth work a better position and more political recognition in our societies. This is also reflected in the Resolution of the Council of the European Union on Youth Work of November 2010 which stresses the importance of recognising the crucial role of youth work as a provider of non-formal learning opportunities to all young people.

At the end of the first decade of the 21st century, the situation of young people in Europe is complex and diverse. Non-formal learning and education – and youth work in general - has the potential to address many of the issues that concern young people. It helps young people in making better educational choices, gives them larger and better possibilities to learn and helps them demonstrate their skills. A better social recognition of non-formal learning outcomes helps to empower young people and can lead to increased participation in our societies and democratic participation.

The Pathways paper is addressed to all those interested in further improving the status and relevance of youth work (and - as part of it - of non-formal learning) and involved in developing and implementing better strategies and instruments for recognition.

2. Non-formal education and learning in the youth field - characteristics and impact

Education and learning in the youth field encompasses various types, methods, settings and approaches of learning. Even if it is generally understood to be non-formal education/learning, it also includes elements of informal learning and is sometimes very close to formal education.

Non-formal learning and education, understood as learning outside institutional contexts (out-of-school) is the key activity, but also the key competence of youth work. Non-formal learning/education in youth work is often structured, based on learning objectives, learning time and specific learning support and it is intentional. It typically does not lead to certification, but in an increasing number of cases, certificates are delivered, leading to a better recognition of the individual learning outcome.

Some elements of youth work can be considered to be formal education/learning and training. In specific cases the youth sector / youth work acts as a substitute, alternative education and training provider (e.g. in second chance schools and similar projects, in

---

3 Further information see chapter 3.1 (Council of Europe) and 3.2 (European Union)
special Vocational Education and Training projects) for school drop-outs, early school leavers, disaffected young people or other young people at risk. The learning process is structured in terms of learning objectives, learning time and learning support and it is intentional; the participants get certificates and/or diplomas.

Youth work activities also provide many informal learning opportunities, as young people learn while simply being active, being a volunteer or just being with their peers. They learn informally in daily life and leisure time just as they learn informally in school, at work and in family life, just learning by doing; it is typically not structured and not intentional and does not lead to certification. It provides specific learning opportunities, in particular of social, cultural and personal nature, often called "soft" skills.

All learning in the youth field enables young people to acquire essential skills and competences and contributes to their personal development, to social inclusion and to active citizenship, thereby improving their employment prospects. Learning activities within the youth field - and youth work in general - provide a significant added value for society, the economy and young people themselves. Youth work is situated between the social sector, pedagogy and civil society.

Participation in activities in the youth field contributes in various ways to the acquisition of the 8 key competences as identified in the framework of lifelong learning:\(^4\): communication in the mother tongue as well as in a foreign language, mathematical and scientific competence, digital competence, social and civic competences, learning to learn, sense of initiative and entrepreneurship, cultural awareness and expression.

Education and learning activities within the youth field have a participative and learner-centred approach, are carried out on a voluntary basis and are therefore closely linked to young people's needs, aspirations and interests. Important key elements are peer learning, learning environments and the diversity of approaches and target groups. Formal learning emphasises cognitive learning, non-formal settings often complement cognitive aspects by emotional, social and practical levels of learning.

Learning activities within the youth field are shaped by a specific character of learning which was developed over years and takes into account the specific situation of young people in societies. In particular within the European youth field non-formal and informal learning/education activities provide an intercultural learning dimension which supports the intercultural dialogue between people.

Learning in the youth field at European level is also about guaranteeing and improving quality standards in and through training. In this respect the long term training courses of the EU-CoE youth partnership “Advanced Training of Trainers in Europe” 2001-2003 (ATTE) and “Trainers for active Learning in Europe” 2008 – 2010 (TALE) were flagship projects in the field, as well as the ACT-HRE course of the Council of Europe. Reference should also be made to the training manuals that were produced in this framework, especially the “Manual for facilitators in non-formal education”\(^5\) and “Compass - A Manual on Human Rights Education with Young People”\(^6\) of the Council of Europe as well as the Training-Kits of the EU-CoE youth partnership\(^7\).

3. **Stocktaking – the state of affairs at European and national level**

3.1 **Recognition of non-formal learning/education in the youth policy of the Council of Europe**

A first reference to recognition of non-formal learning in youth activities can be found in the final declaration of the 5th conference of European Ministers responsible for youth, meeting in Bucharest in April 1998, inviting the Member States to recognise training and skills acquired in non-formal education.

A working group of the European Steering Committee for Youth (CDEJ) provided a first definition of non-formal education: "Non-formal education may be defined as a planned programme of personal and social education for young people designed to improve a range of skills and competencies, outside but supplementary to the formal educational curriculum. Participation is voluntary and the programmes are carried out by trained leaders in the voluntary and/or public sectors, and should be systematically monitored and evaluated. The experiences might also be certificated."

As a follow-up the Directorate for Youth and Sport in the Council of Europe organised a symposium on non-formal learning in fall 2000, in order to define a strategy for the implementation of a work programme in the field of non-formal learning.

Shortly after the symposium, the Parliamentary Assembly of the Council of Europe adopted a Recommendation on non-formal education, highlighting the need for more investment in education and welfare as an efficient strategy for enhancing active citizenship and the prevention of social exclusion; non-formal education provided by non-governmental youth organisations is considered to play a crucial role, complementing formal education in the concept of lifelong learning. The Assembly recommends to recognise non-formal education as *de facto* partner in the process of lifelong learning and in youth policy and to create effective systems for evaluation.

The final declaration of the 6th conference of European Youth Ministers meeting in Thessaloniki of November 2002 highlights the relevance of voluntary engagement of young people and recommends the development of appropriate strategies and tools for a better recognition of experiences and skills acquired in these activities at all levels.

In a Recommendation to its Member States on the promotion and recognition of non-formal education of young people, the Committee of Ministers of the Council of Europe reinforces the debate on non-formal learning by recommending the development of effective standards for the recognition of non-formal education, an important part of general education and training. Non-formal education should be a significant element of national youth policies and cooperation at European level should be enhanced.

---

9 Cit: Study on the links between formal and non-formal education, prepared by Manuela du Bois-Reymond, Strasbourg, March 2003, page 12

11 Recommendation 1437 (2000) on Non-formal education

12 6th Conference of European Ministers responsible for Youth: Youth constructing Europe – Final Declaration, Thessaloniki, Greece, 7-9 November 2002

13 Recommendation Rec(2003)8 of the Committee of Ministers to Member States on the promotion and recognition of non-formal education/learning of young people (Adopted by the Committee of Ministers on 30 April 2003 at the 838th meeting of the Ministers’ Deputies)
Accordingly non-formal and informal learning plays a prominent role in the advisory missions and youth policy reviews of the Council of Europe, tools to promote and support the development of youth policies in the member states.

As a new proposal, the Committee asks to develop a European Portfolio as a tool to describe experiences, skills and competences which are acquired in non-formal settings. The European Language Portfolio, developed by the Council of Europe as one out of five instruments of the Europass\(^\text{14}\), is seen as an example for such a youth work portfolio.

Consequently the CDEJ decided to invite an expert group to work on the development of the Portfolio. The focus was given to the description of experiences and competences of youth workers and youth leaders. The tool should allow, to identify and to describe progress in non-formal learning. The demand for a better recognition existed at two levels: the political and the individual one. Competences should be proved in a procedure of self-assessment. After a phase of development and testing in 2007 the Portfolio was disseminated largely and translated into various languages. After an in-depth evaluation a revision is foreseen in 2010 - 2011.

In a meeting of Youth Ministers in September 2005 in Budapest on the key priorities of the youth sector for the period 2006-2008\(^\text{15}\), the priority of recognition of non-formal education and of youth work was confirmed.

A next milestone was set with AGENDA 2020 – the future youth policy of the Council of Europe\(^\text{16}\). In a final declaration of youth ministers meeting in October 2008 in Kiev it is stressed that access of young people to education, training and the labour market has to be improved, in particular by promoting and recognising non-formal learning.

In a background document, the secretariat of the Directorate for Youth and Sport\(^\text{17}\) underlines the need to reinforce the work done so far and especially to continue the activities of the partnership between the Council of Europe and the European Commission in the field of youth by highlighting the particular role of non-formal learning for a better access to the labour market.

A particular relevance to Agenda 2020 was given by the Resolution of the Committee of Ministers in November 2008\(^\text{18}\). It stated that recognition of non-formal learning plays a crucial role for social inclusion by “ensuring young people’s access to education, training and working life, particularly through the promotion and recognition of non-formal education/learning”.

The contribution and potential of non-formal learning to promoting the core values and mission of the Council of Europe has been recognised in the Council of Europe Charter on Education for Democratic Citizenship and Human Rights adopted by the Committee of Ministers in May 2010. The charter acknowledges the important role of non-formal education in providing every person with the opportunity of education for democratic citizenship and human rights education. It also states that “non-governmental

organisations and youth organisations have a valuable contribution to make (…),
particularly through non-formal and informal education”19.

Youth work and non-formal learning have also an important role in promoting access to
social rights and social inclusion of young people. The Enter! project of the Directorate of
Youth and Sport20 will result in a recommendation addressing this issue. By involving
other policy sectors of the organisation, the project also supports the mainstreaming of
non-formal education approaches.

3.2 Recognition of non-formal learning/education in the youth
policy of the European Union

Policy strategies in the youth field in the European Union are built on the White Paper
‘A new impetus for European youth’, adopted by the Commission in November
200121. With regard to non-formal and informal learning, it emphasises the need for
greater recognition of relevant activities and greater complementarities with formal
education and training. Since the launch of the White Paper, recognition plays a
prominent role, both in regard to policy development and in practical terms.

The Presidency Conclusions of the European Council of 23 March 2005 agreed on the
European Youth Pact as a fully integrated part of the Lisbon Strategy. One objective of
the pact is to develop closer cooperation between the Member States on transparency
and comparability of occupational qualifications as well as to recognise non-formal and
informal learning22.

The Council Resolution of May 2006 on the recognition of the value of non-formal and
informal learning within the European youth field invites the Member States and the
Commission to “encourage the development of a comparable and transparent youth-
specific element within Europass for identifying and recognising the skills and
competences acquired by young people through non-formal and informal learning […],
that could be attached to certificates or other recognition tools in order to make it easier
[…] to understand what the original certificate means in terms of the knowledge, skills
and competences acquired by its holder”23.

With the new EU-Strategy for Youth-Investing and Empowering24, non-formal learning
becomes for the first time a priority for policy cooperation in the youth field at European
level: "Complementary to formal education, non-formal education for young people
should be supported to contribute to Lifelong Learning in Europe, by developing its
quality, recognising its outcomes, and integrating it better with formal education”.
This priority was confirmed in the Council Resolution of 27 November 2009 on a renewed
framework for European cooperation in the youth field (2010-2018). As a complement to

22 Communication to the Spring European Council: Working together for growth and jobs.
Council 17 June 2005.
23 Resolution of the Council and of the Representatives of the Governments of the Member States,
meeting within the Council, on the recognition of the value of non-formal and informal learning within
the European youth field (2006/C 168/01).
24 Communication from the Commission to the Council, the European Parliament, the European
Economic and Social Committee and the Committee of Regions: An EU Strategy for Youth –
Investing and Empowering. A renewed open method of coordination to address youth challenges and
formal education, non-formal learning for young people should be promoted and recognised, better links between formal education and non-formal learning be developed.

Youth-related aims and possible initiatives in the field of education and training at the level of the Member States and the Commission could be, among others:

- development of youth work and other non-formal learning opportunities as a means to address early school leaving;
- use of tools established at EU level for the transparency and validation of skills and recognition of qualifications;
- promotion of learning mobility of all young people;
- use of formal education and non-formal learning to promote cohesion and understanding across different groups, promote equal opportunities and narrow the gaps in achievement;
- development of participative structures in education as well as cooperation between schools, families and local communities;
- raise of a broader public awareness of the value of non-formal learning outcomes.

The Commission commits itself to further develop Europass as a European instrument for the transparency of skills, including tools for self-assessment of skills and competences.

The new EU Youth Strategy also highlights the role of youth work as an important means to foster the personal and professional development of young people. Youth workers should be better equipped with professional skills and the validation of their competences be promoted through appropriate European instruments such as Europass, the European Qualifications Framework, the European Credit Transfer System or the European Credit System for Vocational Education and Training.

The Council Resolution on Youth Work of November 2010 confirms the important role that non-formal learning plays in youth work by complementing formal education settings. It invites the Member States and the European Commission to support the development of tools and instruments for assessment and documentation of skills and competences of youth workers and youth leaders.

The European Union’s Youth in Action Programme makes an important contribution to the acquisition of competences and is therefore a key instrument in providing young people with opportunities for non-formal and informal learning in a European dimension. It contributes to the involvement of young people in experiences characterised by a twofold dimension: the acquisition of skills through non-formal or informal learning and the development of their active citizenship.

To facilitate the validation and recognition of non-formal learning in the Youth in Action programme it was decided to develop a specific tool, Youthpass. Through the Youthpass certificate the European Commission aims at ensuring the recognition of learning experiences gained through the participation in the various actions of the Youth in Action Programme. After successful implementation, Youthpass is being extended to all relevant YOUTH IN ACTION activities and potentially beyond the programme actions where appropriate.

---

26 Resolution of the Council of the European Union on Youth Work of 19 November 2010
In March 2010, the Commission launched the new EU2020 Strategy. Youth on the Move is one of the flagship initiatives to support the overall strategy. Youth on the Move is expected to support the engagement of young people in society through all levels of education and youth policy, including learning opportunities for young people with fewer opportunities. This includes strengthening the structures for volunteering and youth participation, and supporting the acquisition of key skills through non-formal educational activities as a supplement to formal learning or as an incentive to reintegrate back into the formal education system.

A key document in terms of learning mobility is the Council Recommendation on the Mobility of Young Volunteers across the European Union. It asks Member States to increase awareness of the importance of intercultural competences and language learning in order to reduce barriers to the cross-border mobility of young people and to promote appropriate recognition of learning outcomes of voluntary activities. It further encourages the use of instruments at EU level that can facilitate cross-border voluntary activities by ensuring the transparency of qualifications, such as Europass, Youthpass and the European Qualifications Framework.

3.3 Developments at national level in the Member States

Also at national level in Member States of both European Union and Council of Europe, recognition of non-formal and informal learning in the youth field has become a more important issue over the last years. Initiatives are either coming from organisations active in the non-formal learning field or from the different governments implementing relevant strategies. A wide range of recognition instruments for non-formal and informal learning already exist on local, regional and national level as well as in different sectors of the youth field.

In the current framework it is impossible to mention all the diverse and manifold initiatives in the field. Information about validation of non-formal and informal learning, including the youth field, is made visible through the ‘European Inventory on validation of non-formal and informal learning’ (see chapter 3.5 on the links to lifelong learning).

3.4 The European Youth Forum and the work of non-formal education providers

The European Youth Forum, as a key stakeholder in the European debate representing both young people and youth organisations as providers of non-formal education, has been working on recognition of non-formal education since 1996 and has declared education as one of its five strategic priorities for 2007-2012. Within this strategic priority, the Forum sees the further recognition of non-formal education as a precondition to develop a true lifelong learning reality in Europe.

29 COUNCIL RECOMMENDATION of 20 November 2008 on the mobility of young volunteers across the European Union (2008/OJ C 319/03)
The European Youth Forum works on different complementary types of recognition, social, individual and political. Through its policy papers of 2005\textsuperscript{30} and 2008\textsuperscript{31}, YFJ contributed to the political recognition and advocated for recognition in various processes at European level. This has been complemented by work on social recognition and individual recognition. In practical terms, the European Youth Forum organised a yearly dialogue on non-formal education with the aim of bringing providers of education together with institutions, social partners and stakeholders.

In 2008, the European Youth Forum published a sunshine report on non-formal education, presenting best practices from its member organisations with a focus on how non-formal learning contributes to personal development as well as to social inclusion, health and citizenship.

In 2009, the European Youth Forum started working on one of the big challenges for non-formal education, quality assurance of non-formal education/learning. It adopted a policy paper proposing a European scheme for quality assurance and a practical working method for youth organisations. This has been followed by a pilot project testing out the proposed methods.

3.5 Linking to the lifelong learning strategy

Non-formal learning and education as an integral part of lifelong learning received full recognition with the European Year on Lifelong Learning in 1996 and gained momentum with the Conclusions of the Lisbon European Council on 23 and 24 March 2000. The conclusions defined new strategic objectives to strengthen employment, economic reform and social cohesion as an integral part of a knowledge-based economy.

The Communication of the European Commission in 2001 on ‘Making a European area of lifelong learning a reality’ prepared the shift towards a stronger recognition of learning outcomes and underlined the need to recognise competences acquired in non-formal and informal settings\textsuperscript{32}.

During the following years policy cooperation in education and training supported national reforms of education and qualification systems, as well as the development of European instruments promoting quality, transparency of qualifications and mobility in learning. With a number of relevant documents focusing on vocational education and training and lifelong learning\textsuperscript{33} \textsuperscript{34}, the Member States were encouraged to increase cooperation and implement effective measures to validate learning outcomes, crucial for building bridges between formal, non-formal and informal learning.

The 2009 Council Conclusions on the new Strategic framework for European cooperation in the field of education and training ("ET 2020")\textsuperscript{35} reiterated the equal importance of all different kinds of learning – formal, non-formal and informal learning – to make lifelong

\textsuperscript{33} The Helsinki Communiqué on Enhanced European Cooperation in Vocational Education and Training Communiqué of the European Ministers of Vocational Education and Training, the European Social partners and the European Commission, convened in Helsinki on 5 December 2006 to review the priorities and strategies of the Copenhagen Process.
\textsuperscript{34} Council Resolution of 27 June 2002 on lifelong learning, OJ C 163/1, 9.7.2002
learning and learner mobility a reality and to put in place coherent and comprehensive lifelong learning strategies at Member States level.

One of the main challenges and priorities is to ensure that all citizens can acquire transversal key competences according to the Recommendation on Key Competences for Lifelong Learning\textsuperscript{36}, agreed upon in 2006.

As a consequence of changes in the labour market, the focus is put more and more on the development of skills and competences, including soft skills; social skills, ICT skills, emotional skills, creativity, entrepreneurial spirit etc. To this end, school and out-of-school education have become complementary. The recognition of learning outcomes is now considered a driver for employability, mobility and social inclusion.

This trend goes together with some crucial developments in the area of recognition and validation of skills and competences:

\begin{itemize}
\item The European Qualification Framework\textsuperscript{37} (EQF) shifts the focus from 'learning inputs' (length of studies, or type of institution) to 'learning outcomes'. It encourages lifelong learning by promoting the validation of non-formal and informal learning.
\item Most Member States are developing their own National Qualifications Frameworks (NQFs) and linking it into the EQF.
\item The European Credit System for Vocational Education and Training (ECVET) facilitates validation, recognition and accumulation of learning outcomes acquired during a stay in another country or in different learning contexts. It aims for better comparability between different VET and qualification systems.
\item The European Skills, Competences Occupations and qualifications Taxonomy (ESCO) is being developed to bring the worlds of work and education/training closer together. It will build a multi-lingual shared vocabulary of skills/competences and enable them to be related to occupations and qualifications. Such a vocabulary can be used in a number of ways including underpinning better matching between supply and demand in the labour market and making the relevance of learning outcomes to occupations and tasks clearer to employers and citizens.
\end{itemize}

As stressed above, information about validation of non-formal and informal learning is made visible through the 'European Inventory on validation of non-formal and informal learning'\textsuperscript{38}, an initiative of the European Commission and the European Centre for the development of vocational training, CEDEFOP. The 2007 update pointed to a multi-speed process where, broadly speaking, countries could be divided into three main groups:

\begin{itemize}
\item Countries where validation has become a practical reality for individual citizens and where the number of candidates is significant. These countries have largely put in place national systems turning validation into an integrated part of their education and training and employment policies.
\end{itemize}

\textsuperscript{36} 18 December 2006 - 2006/962/EC -
\textsuperscript{37} RECOMMENDATION OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL of 23 April 2008 on the establishment of the European Qualifications Framework for lifelong learning (2008/C 111/01)
• Countries where validation is emerging as a practical reality for individuals. In these cases legal and institutional steps have been taken but the take-up is relatively limited.
• Countries where validation is low on the political agenda and where concrete initiatives are relatively few and not part of an overall strategy.

The Inventory is considered to be a “living” document, updated every few years; the next update is due at the end of 2010. It includes non-formal and informal learning in the youth field.

The common European principles on validation, adopted by the European Council in 2004, represent a political consensus on the fundamental aspects of a broad framework namely: individual entitlements, obligations of stakeholders, confidence and trust, credibility and legitimacy. The European Guidelines on validation published by the European Commission and Cedefop in 2009 complement the principles by providing more in-depth concrete advice to policy makers and practitioners. Updated regularly they need to be further developed for particular target groups, such as young people.

The CEDEFOP Virtual Community on non-formal learning provides a communication platform for the development and implementation of methods and systems for identification and validation of non-formal learning. Established already in 2003, the Virtual Community is intended as a meeting place for everybody interested and involved in the field - policy makers, practitioners, researchers and others.

Whilst important steps have been taken at European and national level, the European Commission believes a stronger political basis is needed to pursue more systematic cooperation and tap the full potential of this field. This is in line with the Europe 2020 strategy and the May 2010 Council Conclusions on competences supporting lifelong learning and the 'new skills for new jobs' initiative which explicitly call for ‘the promotion of the recognition of non-formal and informal learning’.

A public consultation has been launched to collect views on whether further action is needed, if so, the type of action required and which policy priorities should be given attention.

The Commission considers it is very timely to address the issue of validation now as the implementation of transparency instruments such as the EQF – and the related development of national frameworks which describe qualifications in terms of what people know, understand and can do regardless of where or how the learning was acquired - provides the scope to develop an integrated approach to the promotion and validation of non-formal and informal learning.

The 2011 European Year of Voluntary Activities Promoting Active Citizenship, which includes the recognition of skills and competences developed through volunteering in its objectives, will also help to build momentum as will the actions to support digital literacy, skills and inclusion in the Digital Agenda for Europe.

---

4. Pathways towards a better recognition of non-formal learning/education in the youth field – 10 elements for a renewed strategy

When re-defining a further strategy for a better formal, social and political recognition of non-formal and informal learning of youth work, it is important to highlight some principles and challenges that need to be considered when discussing strategic options.

It is obvious that one cannot speak of one single youth work sector. The diversity of the youth field with regard to disciplines, methods, approaches, tools and priorities must be respected and cultivated. It is not about harmonising or streamlining the sector to one monolithic system when aiming at a better recognition of the work done.

With regard to recognition and certification, the concerns of many experts and stakeholders, notably youth NGO’s, must be taken seriously: the risk to (over)formalise learning in youth work activities. Not everything in youth work is measurable and can or should be assessed, recognised and certified.

In this respect, any hierarchisation of youth work activities must be avoided, nor can a functionalisation of learning outcomes only for purposes of the labour market, the education system or social system be accepted, particularly when it comes to funding and allocation of financial means. On the contrary, it must be made clear that youth work enriches other policies only if it maintains its particular identity and strength; only then other sectors can benefit from youth work. Youth work stands for itself, it has its own self-worth and in many cases its own pertinacity e.g. the right to have fun and to play.\(^{42}\)

It is also of importance to make a distinction between different forms of recognition, depending on who recognises learning and for what purpose. The forms of recognition are:

- **Formal recognition** means the ‘validation’ of learning outcomes and the ‘certification’ of a learning process and/or these outcomes by issuing certificates or diplomas which formally recognise the achievements of an individual;\(^{43}\)

- **Political recognition** means the recognition of non-formal education in legislation and/or the inclusion of non-formal learning/education in political strategies, and the involvement of non-formal learning providers in these strategies;

- **Social recognition** means that social players acknowledge the value of competences acquired in non-formal settings and the work done within these activities, including the value of the organizations providing this work;

- **Self recognition** means the assessment by the individual of learning outcomes and the ability to use these learning outcomes in other fields.

Despite significant progress in some Member States, a lack of communication and continuous dialogue between all stakeholders involved in the process has to be stated.

---

\(^{42}\) Hanjo Schild, Loreta Senkute, Jan Vanhee: The right to play and to have fun in youth and community work; in COYOTE magazine extra, July 2010

\(^{43}\) Communication from the Commission: Making a European Area of Lifelong Learning a Reality, p.31e
This concerns a better, currently cumbersome communication within the youth field on practices, tools and political strategies, as well as an exchange and co-operation between the education and training system, the labour market and the youth field.

Finally, it should be stressed that the most efficient learning concept is a holistic one, combining formal, informal and non-formal elements. While formal learning emphasises mainly cognitive learning, non-formal settings complement cognitive aspects by emotional, social and practical levels of learning. Youth work provides such holistic approaches in many facets. The concepts of holistic and blended learning approaches should be further developed and youth work certainly can contribute with its experiences and concepts to such a development. A precondition would be an open dialogue at an equal level with the formal education and training system.

When reflecting on a new and updated strategy to make further progress towards a better formal, social and political recognition of non-formal learning/education and youth work, eleven elements have been identified:

1) **Develop a common understanding and a joint strategy in the youth field and improve co-operation and communication**

The youth sector must find a common ground to further define and implement strategies for recognition of youth work. The whole sector of youth work is concerned, diverse disciplines, various methods and approaches, comprising all forms of learning as well as all forms of recognition, be it formal, social, political. There must be a common understanding of what should be recognised, how and by whom, and ranges from concepts of self-recognition to measures of making results of youth work visible. It must also be made clear, who plays which role in this process and which responsibilities the various groups of actors have. Since the youth sector reflects such a huge diversity of people active at various levels, in various positions, functions and roles, coming from diverse backgrounds, structures and disciplines a better co-operation and communication culture is needed. In the follow-up, the setting of common objectives for the further development of the youth work sector could be envisaged, based on clear mandates, time-schedules and planned outputs.

2) **Make the role of youth organisations visible**

Youth organisations and other providers of non-formal learning need to increase efforts to make the learning taking place in their activities and programmes clearer and more visible. First of all, a challenge remains for youth organisations to attract young people as volunteers and participants. Volunteering is sometimes seen as an unnecessary waste of time. The level of awareness of the benefits that volunteering brings to the society and the individual is insufficient. Therefore, recognition of learning needs to start within the organisation. The role of youth organisations is to increase social and self-recognition and to adapt and provide tools for assessment and recognition. Youth organisations can also contribute to enhance political recognition through active advocacy and participation in policy processes.

---

44 The debates in the 1st European Youth Work Convention in July 2010 under the Belgian EU-Presidency can be considered a milestone in this regard and must be continued.
3) **Assure quality and training in non-formal education/learning**

There is still a lack of confidence regarding the effectiveness of non-formal learning and youth work activities, both within the youth field and society. If non-formal learning/education aims at being positioned in the political debates at a similar level as the formal education and training sector, quality assurance might be the missing element. Quality and quality assurance can also be instrumental for the further development of youth work providers who engage consciously in the design of their educational programmes. Another measure to assure high quality and to strengthen the conceptual idea is to provide and establish appropriate training opportunities at different levels. The quality standards in training activities of the Directorate of Youth and Sport of the Council of Europe, particularly in the programme of activities of the European Youth Centres, provide interesting starting points: these should be reviewed and complemented with new experiences, especially those integrating e-learning and blended learning approaches. Also the European Training Strategy of the Youth in Action programme plays a key role in this respect. Further, the process initiated by the European Youth Forum to develop a European Framework for the Quality Assurance of non-formal education by 2015 should be supported.

4) **Increase knowledge about non-formal education/learning in youth work**

The continued conceptual, practical and theoretical development of non-formal learning in youth work is essential for strengthening the capacity and the recognition of non-formal learning; this refers to research and practice. A coordinated strategy should be set up and anchored between research, policy and practice to deliver scientific and experiential knowledge. The strategy should compile existing knowledge, ensure an easy access to it for decision makers and youth organisations and identify gaps in knowledge and needs for further research. Experiences and approaches from other regions of the world and from other institutional actors (e.g. UN, ILO, World Bank) should be taken into account. An inventory on non-formal learning in the youth field could be updated and published regularly and the European Youth Report could provide a regular chapter on non-formal education/learning. The European Knowledge Centre for Youth Policy (EKCYP) already provides relevant information on the topic and will further introduce a new feature on youth work.

5) **Develop existing tools further and make them accessible and transferable**

Results of learning can be used in all different settings and for various purposes, be it in education or employment, civil society or for personal development. While diplomas and qualifications received in formal education serve as transfer documents, certificates of the youth field are lacking credit. Even instruments for assessing and validating competences acquired in non-formal learning in youth work (see Youth Worker Portfolio and Youthpass) that have been developed in recent times at European level are rarely recognised by formal education or the employment sector. After having successfully developed these tools it is time to evaluate them, to improve them where needed, to disseminate them and to identify needs for further instruments, e.g. for self-assessment, and other accompanying support measures.
6) Reinforce the political process at European level

If the youth field wants to create and to follow a visible political agenda it needs stronger commitment and a reinforcement of the political processes, in particular at European level but as well by Member States. In Education and Training respective policies are based on the lifelong learning strategy, the Bologna process promotes Higher Education as the Copenhagen/Bruges processes does for Vocational Education and Training. In the Czech EU Presidency event on recognition of non-formal learning in the youth field in Prague 2008 the youth sector proposed to launch a Prague process for recognition of non-formal learning. This process never really took off. Supported by recent political developments in the field of youth work it is now time to fully start such a process involving European institutions, Member States, youth NGO’s, trainers, youth workers / youth leaders and researchers.

7) Link youth to the lifelong learning strategy and vice versa

The communication and co-operation with the lifelong learning, respectively formal education and the vocational education and training sector has to be improved. At European Union level a link should be established between the Open Methods of Coordination in education and training and the youth field. Also in the Council of Europe a dialogue with other educational policies e.g. Higher Education and/or Human Rights and Citizenship Education should be deepened. It must be made sure that the education sector recognises learning in youth work as a value in itself and communicates on an equal level as it does within the formal education sector. In the European Union, the Youth on the Move initiative can be the overarching policy framework that can bridge the two policy fields. The future European Skills Passport should, among others, record skills acquired in youth work and facilitate validation through appropriate procedures.

8) Involve stakeholders of the employment sector

The labour market needs work force skilled with a set of key competences among which soft skills play an increasing role. Problem solving, intercultural skills, team spirit, creativity etc. are exactly the competences that young people acquire in non-formal learning schemes of youth work. While in the political debates a lot of attention is dedicated to ‘validation’ of non-formal learning outcomes at the work place (and in formal education and training), the impact of learning in youth work activities is constantly undervalued, particularly on the side of employers. A common understanding and language should be developed in order to provide the employment sector with appropriate information on the potential of non- and informal learning in youth work. And youth work needs to identify its potential of providing competences for the labour market; at the same time it must be made clear where the limits of this role are.

9) Associate the social sector

Youth work is positioned between education, civil society and the social sector. Even if the links of many youth work activities to the social sector seem to be quite strong, the relationship is in general often still weak. This is specifically true for the relationship of some disciplines of youth work such as open youth / community work and leisure time activities to youth social / welfare work and youth care. The different disciplines of youth work, even if part of the same sector, don’t know much about each other. Youth social work often is closer to the social sector than to the youth field. This is proven also when looking at providers of youth social work which mostly are welfare organisations, in rare cases they are youth organisations. A minimum requirement would be the building of strategic partnerships and much better information systems between the various fields.
10) Cooperate with other policy fields and with stakeholders of civil society

In the last years the youth sector has steadily grown towards a considerable part of the third sector, in terms of resources invested and size of the work force and thus strengthened its socio-economic scope. Today it is a strong pillar of civil society, together with other stakeholders and NGO’s, and it has increased links to other policy fields which have an impact on youth work such as education, sport, intercultural dialogue, urban and rural policies, intergenerational dialogue. The players in these sectors should be seen as natural strategic partners for the youth field. The volunteer sector, cultural and environmental organisations, human rights organisations, information and counselling services, sport organisations etc., all are part of the third sector and share similar interests. The recognition of youth work (and of the work of the neighbouring sectors) can be increased through a closer cooperation between them.

5. Conclusions

Non-formal education/learning in the youth field provides unique learning opportunities to millions of young Europeans every day. This is done through a diversified youth work structure often based on a voluntary and participative approach and a special educational field which provides an added value for society and individuals. Learning in and from youth work forms the basis for active citizenship, cultural expression, self-development into confident adults, for a European civil society, political participation, health and well being, social inclusion...

It is for this reason that the European institutions, European Union and Council of Europe have decided to bring youth work and its formal, social and political recognition higher on the political agenda, welcomed by all relevant stakeholders in the field.

It is now time to continue the pathways towards a better recognition by implementing concrete steps and developing concrete strategies and tools. Some ideas are mentioned in this paper, others need to be explored, defined and implemented. It should not only be the responsibility of those who worked on this paper to implement its proposed actions; recognition of non-formal learning in the youth field should be the responsibility of all players in youth work, a shared ownership.

The EU-CoE youth partnership is committed to continue the efforts for a better recognition of youth work and has therefore made “support and recognition of youth work” one out of two key priorities for the years to come. As a next activity it will organise another symposium on recognition of youth work, 11 years after the first one.

Also the European Youth Forum and the SALTO Training and Cooperation Resource Centre will continue implementing its activities as outlined in this paper, particularly on quality assurance and the further development of Youthpass.

We invite all interested parties to provide feedback on this paper and to develop their own ideas and actions for a better recognition of youth work.
